DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- Species I: Embodiment 1, as depicted by Figures 4 and 5.
- Species II: Embodiment 2, as depicted by Figure 8 and 19.
- Species III: Embodiment 3, as depicted by Figures 9, 10, 20 and 21.
- Species IV: Embodiment 4, as depicted by Figure 11.
- Species V: Embodiment 5, as depicted by Figure 13.
- Species VI: Embodiment 6, as depicted by Figures 14 and 15.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 2623

are added after the election, applicant must indicate which are readable upon the elected species. MPEP§809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Species I: Claim 1

Species II: Claims 2-6

Species III: Claim 7

Species IV: Claim 8-10

Species V: Claim 11

Species VI: Claim 12

The following claim(s) are generic: None

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Each species is described as solving an individual problem. The processing unit of each species performs different processing on different combinations of obtained images to generate and display images unique to each species.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
